# **Summary**

Aim	ITP are projects that focus on short- to medium-term, intensive, interactive, and practice-oriented training courses, distinguished by topic. These topics can be about sustainable development, transversal skills for higher education (HE) management, transversal or priority themes (e.g., gender, sustainable development, human rights, digital 4 development, decent work, etc).  Through International Training Programme projects, HE institutions (HEIs) aim to systematically integrate global perspectives. In doing so, they create a supportive, inclusive and networked learning environment in which individual scholars, professionals, and academics acquire transversal skills and state-of-the-art knowledge on sustainable development. This enables them to become experts and critical global citizens, motivated to act as change agents in their network.	
Key features	This enables them to become experts and critical global citizens, moti-	
Target group	Professionals from civil society, private, or public sector and/or academics, scientists, and researchers at HEIs with relevant professional experience in the subject of the organised training.	
Who can apply?	Affiliation and statute of the promoters:	

	<ul> <li>Flemish promoter: employed as a professor (in principle: minimum 10% ZAP) at a Flemish university or a professor/lecturer at a Flemish university of applied sciences and arts<sup>1</sup>.</li> </ul>		
	Optional: in case there is a partner promoter: employed at a recognised higher education institution or national public (not for profit) research institute located in a VLIR-UOS project partner country.		
	Additional criteria:		
	<ul> <li>Only 1 project proposal per applicant (Flemish/partner) can be submitted.</li> </ul>		
	<ul> <li>Promoters of an ITP 2022 project cannot submit any new ITP project.</li> </ul>		
	<ul> <li>Promoters of an ITP 2022 project proposal that was not se- lected, can resubmit their proposal, however, on the condition</li> </ul>		
	that follow-up was given to the assessment of the commission.		
	At the level of the partner institutions, no further criteria apply.		
	Former and present IUC partner institutions are fully eligible,		
	without any restriction.		
Eligible countries	<ul> <li>In case the ITP project includes a partnership with a partner institution, it should concern a higher education or science institution located in one of our 17 project partner countries.</li> <li>An ITP training can be organised in Belgium and/or in one of the 17 project partner countries, with the option of it being held online or blended:</li> </ul>		
	Benin, Bolivia, Burundi, Cuba, DR Congo, Ecuador, Ethiopia, Indonesia, Kenya, Morocco, Peru, Philippines, Rwanda, South Africa, Tanzania, Uganda, Vietnam		
Budgetary Framework	The project budget amounts to a maximum of 150,000 EUR for a maximum duration of 3 years. This period can include multiple training modules and should include a minimum of 8 scholarships per training edition.		
	The overall budget for ITP 2023 allows for a maximum of 9 selectable projects.		
Project duration	Maximum 3 years		
	ı		

-

VLIR-UOS will discuss the eligibility criteria and internal regulations as to project promotership of the respective Flemish HEIs on 16/12/2022 and at VLIR-UOS level, and will provide further clarity as to the eligibility criteria on the VLIR-UOS website shortly after 16/12/2022.

# 1. Introduction

#### 1.1. Higher Education and Science for Sustainable Development

There is an increasing consensus on the role of strong higher education and science institutions (HE&SIs) and systems in addressing sustainable development challenges. Higher education and science institutions play a key role in achieving the UN 2030 Agenda for Sustainable Development (SD) and the 17 Sustainable Development Goals (SDGs) with the aim to end poverty, protect the planet, foster gender equality, defend and promote cultures and cultural understanding, and ensure prosperity for all. In this respect, the Global Sustainable Development Report calls upon all stakeholders to facilitate multidirectional collaboration in science and (transfer of) technology to achieve the Sustainable Development Goals. It considers academic and scientific capacity strengthening and partnerships as one of the four main levers to achieve the 2030 Agenda and implies a strengthened link between higher education institutions, governments, civil society organisations, and the private sector. Higher education institutions offer disciplinary and transdisciplinary teaching and research as they generate and contribute to the development of new and innovative approaches to global, regional, and local issues.

Through research, HE&SIs play a unique role as drivers of change by producing new knowledge and innovation to address global challenges, by transferring knowledge through training, by providing evidence for informed (public) policy and implementation, and by knowledge mobilisation. Through their teaching, universities and university colleges empower generations of new leaders and skilled professionals to drive sustainable development. Today's students are the decision-makers and professionals of tomorrow, who think both critically and ethically, who have learnt to cope with ethical dilemmas, and who can apply systems thinking approaches to serious and complex societal problems.

HE&SIs have also taken up a central role in providing global citizenship education to nurture a global understanding and a more profound intercultural awareness. Through service delivery and community engagement, HE&SIs work with a rich variety of stakeholders — including governments, the private sector, and civil society — for local, national, regional, and global impact.

#### 1.2. FYP2 ambitions

VLIR-UOS outlined new ambitions for its Five-Year Programme 2022-2027 where the Agenda 2030 for Sustainable Development serves as the main reference point. VLIR-UOS is committed to purposefully mainstream the 3 SDG principles of 'Leave No One Behind (LNOB)', 'Interconnectedness' and 'Multi-stakeholder partnerships', throughout its ambitions, policies, programmes, portfolio, partnerships, and scholarships. The focus of Agenda 2030 on meaningful impact through multi-stakeholder partnerships resonates with the ambition of our FYP2, "Connect4Change". It is our goal to focus on cooperation among and beyond academic actors, on collective learning and mutual inspiration (Connect, Learn, Inspire) and on societal impact (valorisation).

These policy ambitions have been translated into the project selection criteria and descriptors for all our programmes. VLIR-UOS wants new projects to **capitalise** on former and/or other relevant projects as a stepping stone, and to stimulate **interinstitutional cooperation** among and beyond academic actors. It is an added value in the competitive selection of projects when collaborations are sought beyond the academic sector or when different Flemish or partner HE&SIs are involved in a project proposal, be it universities, universities of applied sciences and arts, or both.

A specific objective of VLIR-UOS is to mobilise academics who have no prior experience with VLIR-UOS to engage in "sharing minds, changing lives", with a specific focus on young academics, female academics, academics with expertise in disciplines which are underrepresented in VLIR-UOS, etc. This is why the number of projects (proposals) per promoter has been limited for ITP. In case of an ex aequo ranking in the selection of projects, preference will be given to academics without prior experience with VLIR-UOS, to projects coordinated by academics from the underrepresented sex in their sector, and/or to gender-specific projects.

Second objective is to intensify interinstitutional cooperation among Flemish HEIs, especially between universities and universities of applied sciences and arts. The Flemish universities will support the Flemish universities of applied sciences and arts and their lecturers through "associatieve projecten" when submitting and/or implementing VLIR-UOS projects. The universities and universities of applied sciences and arts will also jointly actively promote, facilitate, and activate mutual cooperation through specific initiatives.

#### 1.3. What's new in this call?

- Based on lessons learned from the collective experiences of the VLIR-UOS community with the 2022 VLIR-UOS project calls, some optimisations were introduced concerning the project call and project proposal format, to clarify concepts such as multi-stakeholder partnerships (MSPs), complementarity and coherence.
- The call document structure and ITP narrative format were simplified by using less sector-specific vocabulary and by simplifying certain sections. In terms of requirements, the ToC-approach for ITP projects was further downscaled. The requirement to fill out policy markers and thematic tags has been left out, as is the case for the requirement to identify and fill out the standard indicators.
- The Framework for Scholarships in Belgium has been renewed with revised reference amounts.
- The format for activities' planning and registration of team members, as well as the budget format, were optimised to guarantee a more straightforward upload of information in the online submission tool.
- Finally, given the importance of transparency of the respective roles and responsibilities of the key players in the project, especially in the case of projects involving more than two project partners (partner institutions), some more elaboration is requested in module 3 Organisation. At the level of the Flemish institutions, there is always the distinction between a promoter (and 'main' Flemish institution via which a proposal is submitted) and co-promoters (linked to the same or multiple Flemish HEIs), whereas at the level of the partner institutions (if any) in the partner countries, the promoter role can be taken up by multiple people and institutions. Next to the role of promoters and co-promoters, a variety of experts can be part of a project team (team members).

#### 1.4. Next ITP calls

The ITP call is launched three times within FYP2. The next and last ITP call is scheduled to take place by the end of 2024 for projects to start in 2025.

# 2. Eligibility criteria

Eligibility criteria define whether a proposal meets the minimum criteria to be accepted to enter the selection process. Each call for proposals defines its clear eligibility criteria, using the following sections where applicable. This practice is common within the academic community.

In case of VLIR-UOS calls for proposals, the following eligibility criteria apply:

#### 2.1. Eligibility of applicants: who can apply?

#### Affiliation and statute of the promoters:

- Flemish promoter: employed as a professor (in principle min. 10% ZAP) at a Flemish university; or a professor/lecturer at a Flemish university of applied sciences and arts<sup>2</sup>.
- Partner promoter (if any): employed at a recognised higher education institution or national public (not for profit) research institute located in a VLIR-UOS project partner country.

#### Additional criteria:

- Only 1 project proposal per applicant (Flemish/partner) can be submitted.
- Promoters of an ITP 2022 project cannot submit any new ITP project.
- Promoters of an ITP 2022 project proposal that was not selected, can resubmit their proposal, however, on the condition that follow-up was given to the assessment of the commission.
- At the level of the partner institutions (if any), no further criteria apply. Former and present IUC (Institutional University Cooperation) partner institutions are fully eligible, without any restriction.
- At the Flemish level, the application is submitted via a (main) Flemish promoter. Co-promoters can also be part of the project team. At the partner level (if any), multiple partner institutions can be part of the application, as promotor or co-promotor. If important budgets are to be managed by the partner institution, it is advised to provision a promotor role for contracting reasons (or in case of personnel costs at the partner institute). If the Flemish project promoter or project promotor cannot take financial responsibility for the project on behalf of his/her institution, another person can be assigned as budget holder. This person should be clearly specified in the project proposal (see project module Organisation).

Related to the eligibility check, it is the responsibility of the Institutional Coordinator for Development Cooperation (ICOS) or GEO of the association (see 5.2.1.) to check whether the Flemish promoter is allowed to act as a project promoter and as budget holder within their own institution, by performing a check of the respective relevant internal regulations. The latter is particularly of relevance for projects submitted by Flemish universities of applied sciences and arts.

In terms of the eligibility of the partner promoters, the additional criteria cannot be checked by the ICOS. This is understood as a first check. It is, however, the responsibility of the partner promoter to confirm that the number of project proposals does not exceed the allowed maximum number.

It is the responsibility of promoters or co-promoters who are not only affiliated to a Flemish university or university of applied sciences and arts, but also to an institution which is eligible for DGD funding (e.g. Institute of Tropical Medicine in Antwerp) on a project or structural basis, to assess and confirm that the selection of the

<sup>&</sup>lt;sup>2</sup> VLIR-UOS will discuss the eligibility criteria and internal regulations as to project promotership of the respective Flemish HEIs on 16/12/2022 and at VLIR-UOS level, and will provide further clarity as to the eligibility criteria on the VLIR-UOS website shortly after 16/12/2022.

proposal by VLIR-UOS would not entail a conflict of interest or overlap with DGD funded projects and hence imply double funding by DGD.

It is up to the Flemish associations to decide whether only the ICOS or both the ICOS and GEO will be mandated to check and submit project proposals to VLIR-UOS. Please contact <u>your ICOS</u>.

#### 2.2. Eligibility of budget and implementation period

The budget and implementation period will be checked with the included boundaries in the call. The maximum budget is 150,000 EUR and the maximum implementation period is 3 activity years.

#### 2.3. Eligibility of countries

The ITP is organised in Belgium, at one or more Flemish HE&SI(s), or in one of VLIR-UOS project partner countries or in both.

Activities can be organised in collaboration with / in the following partner countries:

Countr	у
1.	Benin
2.	Bolivia
3.	Burundi
4.	Cuba
5.	DR Congo
6.	Ecuador
7.	Ethiopia
8.	Indonesia
9.	Kenya
10.	Morocco
11.	Peru
12.	Philippines
13.	Rwanda
14.	South Africa
15.	Tanzania
16.	Uganda
17.	Vietnam

Small expenses for activities in non-VLIR-UOS partner countries (e.g., a field trip) can be allowed if these remain limited and fit the finality of the ITP project.

# 2.4. Eligibility of submission

The proposal must meet the submission requirements as described below:

- What? The proposal needs to use/contain all information incl. annexes as requested by the call (see format section 8). Without the requested information (formats), we cannot accept the proposal.
- Who? An application involves a Flemish and possibly one or more partner promoter, but it is the (main) Flemish promoter who submits to the ICOS of the Flemish university (association) for quality control. The ICOS will validate the proposal and submit it to VLIR-UOS.
- How? Project applications must be submitted to the ICOS of the Flemish university association via the new tool for the submission of project proposals.

#### Deadline?

 Proposals must be submitted to the ICOS of the Flemish university association. For specific internal deadlines at the level of the association, check with your ICOS.  The final deadline for submission to VLIR-UOS by the ICOS is 29 March 2023 at 17h00 CET (Central European Time).

# 3. Budgetary framework and implementation

#### 3.1. Available budget

The budget for this call allows for a maximum of 9 projects. This is the 2<sup>nd</sup> ITP Call within FYP2.

#### 3.2. Implementation

After project selection, VLIR-UOS will inform the project promoters on the selection decision and perform a check of essential personal and budget data in view of the contracting procedure. During the contracting procedure, VLIR-UOS will draft an agreement between VLIR, the partner institution, and the Flemish institution with which the promoters of the selected project are affiliated, to establish rules governing the management and use of, and responsibility for the allocated resources.

Selected projects will be able to start as of 1 September 2023 and run for 3 activity years (1 September 2023 until 31 August 2026). **No extension is possible.** Several editions of a training within an ITP project can be implemented during this period, benefiting at least 8 participants each time.

In case the ITP is organised in Belgium, the maximum stay (travel days included) of a (scholarship) participant in Belgium cannot exceed 90 days (minimum being 7 days), which is the maximum number of days for a visa type C.

# 3.3. Financial guidelines for proposal writing

The VLIR-UOS financial framework for ITP projects indicate which expenses are allowed in the framework of a project, how budgets are to be determined, and how expenses are to be accounted for. In order to support the project formulation, we provided a basic set of guidelines needed for filling out the budget proposal. (see Call Annex 2).

The applicable budget lines are:

- A. Investment costs (durable goods with a long life that can be depreciated in the accounts over several years)
- B. Operational costs ("project-related" costs incurred for the purchase and/or operational use of goods that are not depreciated in the accounts and costs directly related to a specific project activity)
- C. Personnel costs
- D. Scholarship costs
- E. Coordination costs
- E.1. Coordination cost in Belgium<sup>3</sup> (10% lump sum from A to D). The distribution of the coordination costs within subcategory '*E.1. Flemish HEI*' in case there are multiple partners, is left to the parties involved.

Or

E.1. Coordination cost at the level of the Flemish institution (5% of the A-D total)

<sup>&</sup>lt;sup>3</sup> Contact the Flemish partner university/university college for more information about the application of E.1.

#### E.2. Coordination cost at level of the partner institution(s) (5% of the A-D total)

The ITP funding format follows a project logic funding, combining the training and scholars' cost, making it possible to set up one or more editions, both in Belgium or in a partner country. While the basic costs for the development of the training are made for the first edition, additional costs can still be made when finetuning and updating the training to differentiate in view of a wider group of students/professionals from/in different regions, when appropriate. Allowing more than one edition within a timeframe of 3 activity years increases the cost-effectiveness. Several mechanisms are in place to ensure optimal and transparent use of the resources, e.g., loss of scholarship entitlement in case of lack of study progress or falsification of information during application, delay or suspension of scholarship for health-related reasons.

#### 3.4. Scholarships

Positive assessment implies an intake of minimum 8 scholarships per edition/training within the ITP. The corresponding scholarship amounts are transferred by VLIR-UOS as part of the project. The Flemish university is responsible for the payments to the scholarship holders, for their reception, housing, organising of insurance, and their general guidance. The scholars do not need to be newly recruited every edition but can be the same group, having a follow-up training.

The short-term scholarship allowances guidelines are incorporated in the budget file. If local/hybrid/online scholarship allowances are used, this must also be included in the proposal (cf. in the budget file). Local/regional scholarships for trainings organised in partner countries need to make use of amounts adapted to the local/regional context. The maximum amount for the scholarship allowance is the amount foreseen for a training held in Belgium.

# 4. Timeline

Start of projects	Project promoters	1 September 2023
End of projects	Project promoters	All projects will end ultimately on
		31 August 2026

# 5. Application modalities

#### 5.1. Methodological approach and formulation guidelines

All projects need to be identified and formulated following the general principles of the Theory of Change approach and the Managing for Development Results paradigm. These principles were translated into an <a href="extensive guide with background information">extensive guide with background information</a>, supporting the formulation of VLIR-UOS projects. The formulation of a project is much more than writing a document. It is a participative process in which partners co-create a project based on a shared vision of change, and a shared understanding of the current situation. A project formulation presentation (<a href="Call annex 1">Call annex 1</a>) specifically for International Training Programmes (ITP) provides practical and operational support and information on the different modules that need to be developed to arrive at a qualitative project proposal. The development of these interrelated modules is explained in a step-by-step process. The modules form the basis for the online project development tool.

The guide consists of 8 Modules<sup>4</sup>, as demonstrated in the figure below:

# 5.2. Application support

The ICOS function as a liaison between the VLIR-UOS Team and the individual Flemish institutions and academics/lecturers. The ICOS are the first line of contact to assist the promoters with the elaboration of their project proposal (eligibility check, explanation of the financial framework, assistance in filling out the project modules, etc.).

As a general principle, support will be provided in a multi-stage process, in which applicants first contact the ICOS at the level of their institution. Where needed, the ICOS will cluster and forward the questions they cannot answer to VLIR-UOS. VLIR-UOS will provide a "Questions and Answers" section relating to the ITP call on their website.

Questions related to the VLIR-UOS project tool can be sent or forwarded to info@vliruos.be.

<sup>&</sup>lt;sup>4</sup> Module 6: risk management, is not included in the application form of Short Initiatives

In the case of this call, 1 general online ITP information session will be organised on **15 December 2022**, from **13:00 to 15:00 CET** (<u>registration link</u>), focusing on the call info, formats, and guidelines. All relevant information is included in this call document but will also be provided on the call page on the VLIR-UOS website.

VLIR-UOS also offers to organise specific training session(s) on proposal writing and on the use of the tool, at the level of the Flemish associations (timing to be determined in consultation with ICOS). Please check the <a href="https://www.website">website</a> or consult the ICOS for updates.

# 6. Selection

#### 6.1. Selection criteria

Each call for proposals will apply the same set of four selection criteria. These four criteria are further defined and translated into a non-exhaustive list of descriptors that are illustrative but provide an objective interpretation of the criteria, both for the applicant as well as for the selection commissions.<sup>5</sup>

Next to the criteria mentioned in the table below, their underlying values are also important in the VLIR-UOS selection system: relevance, coherence, effectiveness, efficiency, expected impact, sustainability, partnership strategy, synergies and learning.

Criteria	Definition	Descriptors		
Relevance and coherence of the project	The extent to which the proposal responds to beneficiaries', global, country, and partner/institution's needs andpolicies (relevance), and fits within the programme Theory of Change (ToC) and within the institution/context (coherence).	addresses/seeks for synergies, complementarities, interlinkages and consistency with these initiatives, in-		
Quality of the project design	The extent to which a proposal presents a convincing project strategy.	<ul> <li>2.1 The proposal presents a realistic and applicable Theory of Change (ToC) narrative: i.e., a convincing project logic, with a clear and realistic flow between a long-term sustainable development objective (impact level), the outcomes expected from the project, and the envisaged intermediate changes (=results) by formulating activities and identifying deliverables linked to one or more of the six standard VLIR-UOS project domains.</li> <li>2.2 The proposal is original, creative, innovative (scientific, academic or pedagogical excellence) in: <ol> <li>(i) its focus on sustainable development and global challenges</li> <li>(ii) its potential for network development</li> </ol> </li> </ul>		

<sup>&</sup>lt;sup>5</sup> Based on the ERC (European Research Council) and OECD-DAC (Organization for Economic Cooperation and Development - Development Assistance Committee) definitions.

		<ul> <li>(iii) facilitating the effective use of acquired knowledge and skills by the professionals upon return in their professional context by effectively acting as agents of change</li> <li>2.3 The proposal elaborates an appropriate and feasible (scientific, academic or pedagogical) methodology or approach which recognizes/addresses the interconnectedness of the sustainable development challenges (e.g., multidisciplinary or systems approaches) (INT)</li> </ul>
Implementation set-up of the project	The extent to which the proposal presents a strong plan and partnership for the execution of the project.	<ul> <li>3.1 The project ToC is translated into a clear planning (which will facilitate effective project execution, follow-up and monitoring through a convincing set of indicators) with a logical and coherent spread of student batches, and adequate measures to deal in an adaptive way with the most important uncertainties (assumptions/risks), with attention to gender, vulnerable groups, and the environment.</li> <li>3.2 The proposal is cost-effective; the budget is reasonable and justified.</li> <li>3.3 It is an added value if the proposal involves a mix of stakeholders (persons and their organisations) (MSP) with the required profile, experience, and expertise to successfully deliver all aspects of the project (quality of the partnership).</li> <li>3.4 It is an added value if in the proposal different (Flemish or partner) HE&amp;SIs are involved, either universities, universities of applied sciences and arts, or both.</li> </ul>
Potential im- pact and sus- tainability	The extent to which the project is likely to produce positive long-term effects (impact) and benefits which will be continued after the project duration (sustainability).	<ul> <li>4.1 The proposal has potential to contribute to applications/policies/services responding to the needs of direct and indirect beneficiaries, with attention for gender, vulnerable people (LNOB), and the environmental impact.</li> <li>4.2 The proposal presents a convincing stakeholder management plan to facilitate stakeholder engagement, with attention to gender and vulnerable people (LNOB).</li> <li>4.3 The proposal identifies clear target groups within an explicit strategy of knowledge uptake and impact on policies or practices.</li> </ul>

#### 6.2. Scoring of the criteria

All proposals are assessed by the commission members, guaranteeing equal treatment and triangulation.

The **scoring** of each of the criteria is done using a qualitative interval scale:

- A: Very good (no revisions are needed)
- B: Good (minor revisions might be needed)
- C: Weak (major revisions are needed, hence the proposal cannot be selected. Proposal can be remediated towards a next submission)
- D: Very weak

During a selection commission meeting, the selection commission will — based on individual scoring — formulate an agreed-upon score for each criterion. In order to be 'fundable', a proposal should obtain an A or B score on each criterion. In case a proposal is awarded with a C or D score for 1 criterion, the proposal is not discussed any further. For fundable projects, the more A's the better, and the following selection criteria are applicable in declining order of priority:

- 1. Relevance and coherence
- 2. Quality of the project
- 3. Potential impact and sustainability
- 4. Implementation set-up

More details about the VLIR-UOS selection system can be found on the VLIR-UOS website.

#### 6.3. Selection commission

#### 6.3.1. Composition

The ICP&ITP Selection Commission consists of 4 independent experts. The commission will be partly recomposed before the ITP 2023 selections.

#### 6.3.2. Follow-up of selection commission meeting

The selection meetings will take place in May 2023. During the meeting of the Regional Selection Committee, the promoters are not expected to orally defend their proposal. The Bureau UOS will ratify this selection.

Once the Bureau UOS has made the final decision about the selection of the project proposals, all promoters will be informed of the outcome of the selection process and the reasons for approval or rejection of their proposal(s), including an indication of criteria that – if relevant - did not reach a sufficient (A or B) score.

# 7. Theory of change and objectives

### 7.1. Aim and key features of ITP projects

#### Aim:

ITP are projects that focus on short- to medium-term, intensive, interactive and practice-oriented training courses for professionals. They are distinguished by topic, dealing with sustainable development, transversal skills for Higher Education (HE) management, transversal or priority themes (e.g., gender, sustainable development, human rights, digital 4 development, decent work, etc). ITP projects systematically integrate global perspectives to create a supportive, inclusive, and networked learning environment in which professionals acquire transversal skills and state-of-the-art knowledge on sustainable development. This enables them to become experts and critical global citizens who are motivated to act as change agents in their network.

The VLIR-UOS ITP vision goes well beyond the organisation of trainings. Through ITP, VLIR-UOS wants to create change agents who can contribute to the development of their home country or other countries after having participated in an ITP. This impact is realised by the target group after the training, as they implement the acquired knowledge and skills in their professional lives. The individual skillset of the trainees has been improved and, because of this, they act as agents of change who effect change in their professional domains: e.g., a more efficient private sector, better policy, leadership, entrepreneurship, social engagement, innovation, better higher education, better research, local technologies, etc.

Two types of programmes are targeted in this ITP 2023 Call:

- Academic training programmes, dealing with topics related to sustainable development challenges, Agenda 2030, and transversal or priority themes, directed towards professionals from civil society, private, or public sector
- Transversal organisational capacity building training programmes, oriented towards professionals of HEI (digitisation in higher education, research communication, change management, scientific writing, QA, how to set up an international relations office, tech transfer, etc.)

An ITP should address **development relevant themes and** challenges and thereby contribute to the general objectives as stated under section 2.2 of this call.

There is no a priori thematic restrictions concerning the scientific fields in which ITPs should be situated. Which **developmental challenges** the proposed ITP claims to address and how it intends to do this for the targeted group of VLIR-UOS scholarship awardees, **should be clearly motivated in the application**. Whether the arguments provided are sound and sufficient, however, is to be assessed by the selection commission.

#### **Key Features:**

- Short-term and medium-term results to be achieved within the project duration of a maximum of 3 years, including training modules for short-term periods of a maximum of 6 months.
- Organised (i) at a Flemish HEI, (ii) in one of the 17 VLIR-UOS project partner countries, or (iii) in a hybrid format.
- Online and blended training can also be integrated into an ITP.
- The ITP format allows flexibility in approaches, including preparatory and follow-up activities on top of the actual training.
- Two types of projects are targeted in this ITP 2023 Call:
  - Academic training programmes, dealing with topics related to sustainable development challenges, Agenda 2030, transversal or priority themes, directed towards professionals from civil society, private or public sector.

- Transversal organisational capacity building training programmes, oriented towards professionals of HEIs (digitisation in higher education, change management, scientific writing, QA, how to set up an international relations office, tech transfer, etc.)
- A minimum of 8 scholarships per training/edition no maximum. These can be the same scholars during several editions.
- ITP projects integrate Global Citizenship in raising awareness for the link between the specific content of
  the ITP and the global challenges of the SDGs; with those acquired transversal skills, trainees will be
  equipped to become agents of change, stimulating their professional organisations to become drivers of
  change.
- Well-defined strategies towards selection of trainees, including multi-stakeholder partnerships (rather than open selection procedures) and the 'Leave no one behind' (LNOB) principle.
- ITP projects seek interinstitutional cooperation (between HEI in Flanders) or synergy and complementarity with other (Belgian) development actors whenever possible to increase the impact potential.
- Applying strategies to link the ITP with the local context of one or more partner countries by e.g. (partial) delocalisation of the programme to (one or more) partner institutions.
- Foreseeing modalities to engage the participation of international trainees.

#### 7.2. Target groups, recruitment strategy, and selection procedure

The precise target group(s) (and criteria) aimed at by the applying promoter needs to be specified in the application, together with preliminary information on the possible participants and a description of the recruitment strategies that will be used (incl. the partners/stakeholders that will be involved in this strategy). The selection criteria must match with the content of the training and must consider the professional and country context of the potential trainees (with a specific attention for the extent to which the newly acquired knowledge can be applied).

The ITP project is responsible for the organisation of the application and selection of the participants and of the scholarship candidates by defining a selection procedure. When elaborating the specific ITP project target groups, the recruitment strategy and the selection procedure following important points of attention, have to be considered:

- The target group of ITP are professionals from civil society, private or public sector and/or academics, scientists, researchers at HEI with relevant professional experience in the subject of the organised ITP. The ITP candidate should be employed at the time of selection and should be able to proof that he/she will remain to be employed after the training (for example by a commitment letter of the employer).
- A 40-60% balance between male and female candidates awarded ITP scholarships is targeted. VLIR-UOS strongly encourages female candidates to apply. Read more about our gender policy <a href="here">here</a>. An ITP proposal needs to identify clear mechanisms to realise this balance.
- There are no age limitations for participants of the training programmes.
- A reasonable cross-section of trainees from different countries and regions is targeted, provided there
  are sufficient qualified candidates.
- In case of equally qualified candidates, preference should be given to candidates from vulnerable groups.
- Scholarship candidates must be:
  - a national and resident of one of the 29 VLIR-UOS scholarship countries
  - OR an employee of a target organisation (HEI, NGO, SME, ...) in one of the **17** VLIR-UOS **partner countries** (candidates can have a different nationality, needs to be an exception).

- Trainees who do not receive a scholarship but who are enrolled in an ITP can also receive limited financial support in the framework of the ITP project (e.g., operational costs such as transport costs, activity-based costs, ...).
- There is no formal limit on the number of VLIR-UOS scholarships one person can receive. However, based on the 'Leave no one behind' principle, we want to give as many new applicants (not having received earlier VLIR-UOS scholarships) as possible a chance to receive a scholarship.

# 7.3. Theory of Change for ITP projects

The ITP projects' Theory of Change below reflects the general Theory of Change for the VLIR-UOS portfolio and how the objectives of ITP fit in the theory. The VLIR-UOS Theory of Change explains how a given project, or set of projects, is expected to lead to a long-term development change. The ToC draws on a causal analysis based on available evidence, clarifying the anticipated pathways to impact. It clarifies how VLIR-UOS wants to contribute to Agenda 2030, which changes ITP projects can make, and how they can do so.

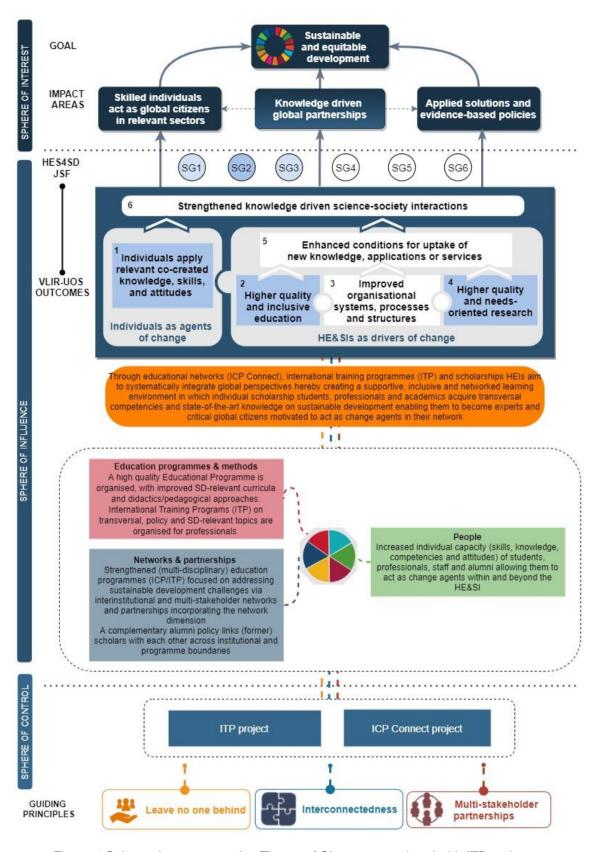

Figure 1 Schematic representation Theory of Change associated with ITP projects

#### 7.3.1. Long-term impact

VLIR-UOS considers global engagement for higher education as a goal (SDG 4: Quality Education) and a means for attaining other SDGs through knowledge co-creation, transfer, and valorisation. In the long run, ITP projects are expected to contribute to more sustainable and equitable development by fostering:

- Application of solutions and evidence-based policies
- A global community of skilled individuals who act as global citizens in relevant sectors
- Knowledge-driven global partnerships

The first impact area relates to the role of higher education in contributing to innovation and the valorisation and application of new knowledge, insights and evidence for sustainable development. Effective partnerships are deemed conducive to ensure the engagement of relevant stakeholders and the creation of opportunities for uptake that can lead to a broader application of this new knowledge by end-users. This can include policy-makers who apply evidence from research in their policies, local communities who adapt new practices that address their local needs, private companies who adapt innovative approaches, etc. ITP projects are considered an excellent approach to create the conditions for uptake as it allows a direct knowledge/skills transfer towards the intended knowledge users.

The second impact area aligns with the evidence provided in the UN Global Sustainability report 2019, which highlights the potential of HE&SIs to develop through their teaching generations of new leaders and skilled professionals. These skilled individuals are expected to drive social and economic development through their contributions in the relevant sectors. As critical global citizens, they are likely to have a multiplier development effect because of (i) their capacity to understand and question global power structures, because they communicate and work/study effectively outside one's environment, because of (ii) their consideration of interdependence and social concern for others, and because of (iii) their civic engagement in the form of pro-environmental and pro-social behaviour. Moreover, the realisation of this impact area can equally benefit from the strengthened partnerships (see impact area 3) that facilitate the creation of networks between tomorrow's change agents and leaders, and the in-flow of strengthened human capital in the labour market. This second impact area also fits well within the ITP concept as ITPs integrate global perspectives and they focus on skilled individuals who can drive social and economic development in sectors relevant for development.

The third impact area draws upon the idea that reciprocal partnerships are essential in safeguarding the cocreation, exchange, and uptake of knowledge within and beyond the scope of the supported projects. In line with SDG 17, VLIR-UOS aims for sustainable, effective, and efficient partnerships on various levels, including the individual, institutional, country, and regional levels. Additionally, the partnerships may involve academic actors (e.g., Higher Education Institutes), as well as other societal players (e.g., private companies, policy makers, civil society organisations). VLIR-UOS further believes that HE&SIs might have a multiplier effect on other HE&SIs in the country or region. As such, the strengthened partnerships are instrumental to achieve the other impact areas. They can also directly contribute to the goal of sustainable and equitable development. This final impact area also matches the ITP concept, as ITP projects enable the development/strengthening of networks of professionals in various sectors, academia, etc., thereby unleashing the full potential of partnerships.

VLIR-UOS considers global engagement for higher education as a goal (SDG 4: Quality Education) and a means for attaining other SDGs through knowledge co-creation, transfer, and valorisation. In the long run, ITP projects are expected to contribute to more sustainable and equitable development by fostering:

Application of solutions and evidence-based policies: In short, this refers to the role of higher education in applying new knowledge, insights, and evidence for sustainable development. Effective partnerships are conducive to ensure the relevant stakeholders are engaged and opportunities for uptake are created. This leads to a broader application of new knowledge by end-users and can include policymakers

applying evidence from research in their policies, local communities adapting new practices that address their local needs, and private companies adapting innovative approaches.

- A global community of skilled individuals who act as global citizens in relevant sectors: In short, this refers to the potential of HE&SIs to develop generations of new leaders and skilled professionals. These skilled individuals are expected to drive social and economic development with their contributions to relevant sectors. As critical global citizens, they are likely to have a multiplier development effect because of (i) their capacity to understand and question global power structures and to communicate and work/study effectively outside one's environment, (ii) their consideration of interdependence and social concern for others, and (iii) their civic engagement in the form of pro-environmental and pro-social behaviour.
- Knowledge-driven global partnerships: In short, this refers to the idea that reciprocal partnerships are
  essential to safeguard knowledge co-creation, exchange, and uptake within and beyond the scope of the
  supported projects. In line with SDG 17, VLIR-UOS aims for sustainable, effective, and efficient partnerships at various levels, including the individual, institutional, country, and regional levels, both within the
  HE sector, and with other sectors.

#### 7.2.2. The difference ITP projects make: project outcomes

To effectively contribute to these generic objectives, VLIR-UOS focuses on two strategic axes:

- Enabling HE&SIs to strengthen and take up their role as Drivers of Change
- Enabling individuals to act as Agents of Change.

Both strategic axes can reinforce one another. For instance, the extent to which HE&SIs take up their role as development actor is likely to affect the embedded scholarship students' development of knowledge, skills, and attitudes that enable them to effectively act as agents of change within and beyond the setting of the HE&SI.

Along these strategic axes, VLIR-UOS identifies six outcomes. Outcomes refer to the change(s) a project want to realise by the end of the implementation period. For ITP projects the outcomes (1), (2) and (4) are the main ones, namely:

- (1) 'Individuals co-create and apply relevant knowledge, skills and attitudes': This outcome indicates the co-creation and transfer of state-of-the-art knowledge and skills to individuals who then apply these in their own professional context. The skills and knowledge also include critical thinking, global citizenship skills and attitudes, leadership skills, etc.
- **(2)** 'Higher quality and more inclusive education': This outcome concerns the improved quality and inclusiveness of education resulting from strengthened educational capacities available at HE&SIs.
- (4) 'Higher quality and needs-oriented research': This outcome reflects the VLIR-UOS strive to strengthen research capacities in order to enable HE&SIs to develop higher quality and needs-oriented research processes and results. This outcome signifies HE&SIs becoming (more) research active and innovative and being enabled to produce solutions to local and global challenges. It also refers to research that is gender sensitive and equity focused as a means for achieving excellence in research.

ITP projects will primarily focus on outcome (1), though may also include outcome (2) and (4) but this will be depending on the priorities and main objectives of each ITP, meaning that some might focus more on (1) and (2) while others focus more on (1) and (4), depending on priorities and needs of the stakeholders. Yet, projects are required to document their choices to ensure alignment with their own strategy. This strategy needs to resonate with the VLIR-UOS vision towards change (= the generic Theory of Change as set out in this document). Because in the long term, all ITP projects combined, should contribute to development changes (cfr. Sustainable and equitable development via the SDGs and Agenda 2030), resonating with the impact areas of the general theory of change of VLIR-UOS.

# 7.3.2. How do projects deliver on their outcomes: domains of intermediate change/outputs

An ITP project can focus on different **project domains** (=domains of intermediate change) that contribute to the different outcomes, with 'Education programme and methods', 'People' and 'Networks and partnerships' being the main ones. It is possible that ITP projects focus on one or more of the other project domains (outreach and policy support; research programmes and methods; systems, policies and infrastructure) and if this is the case, promoters are invited to clarify their focus on one of these additional domains.

The table below presents a non-exhaustive and indicative list of deliverables and activities that individual projects can undertake within the six domains through partnerships between HE&SIs and other local, national, or global stakeholders. The deliverables, processes, and changes in these domains are interlinked and not mutually exclusive. Additionally, it is important to keep in mind that expectations in relation to these domains should vary for ITP projects in view of their distinct scope (in terms of time and budget).

Domain	General description (VLIR-UOS ToC)	Activities (examples)
People	Students, alumni, staff, researchers are trained/sensitised in a supportive learning environment to strengthen their knowledge, skills & attitudes in diverse domains (e.g., leadership, global citizenship).	<ul> <li>An inclusive recruitment strategy is developed and applied.</li> <li>Scholarships are also granted to individuals (from communities) who are typically overlooked, or who are unprepared to participate in traditional educational and scholarship selection processes.</li> <li>Students are supported to become change agents through a variety of practices (like case studies, field work, internships, etc.).</li> <li>Development of adequate skills, knowledge, competencies and attitudes (e.g., scholarships)</li> <li>Application of skills, knowledge, competencies to the workplace</li> <li>Transversal competencies (skills, knowledge, attitudes) for becoming critical global citizens and change agents are strengthened, awareness about gender and environmental issues, human rights, global sustainability challenges. (transversal integration of global citizenship in VLIR-UOS portfolio)</li> </ul>
Education programmes and methods	Improved, innovative, and inclusive teaching methods, didactics, and digital approaches. Improved curriculum content to support knowledge co-creation and equip students with the necessary skills and knowledge to ensure their career development after the training and their ability to tackle global challenges from a holistic and interdisciplinary perspective.	<ul> <li>Educational components are developed and implemented to contribute to developmental change in the region, especially for vulnerable groups in society.</li> <li>New didactical, pedagogic, and teaching methodologies are introduced, adapted, and implemented by staff.</li> <li>Course and training content created with improved integration of equity and equality, e.g., gender concepts, intersectionality, inclusion, (implicit) bias, etc.</li> <li>Innovative curricula and teaching methods are developed, often in co-creation with partner institutions.</li> <li>A supportive, dynamic, interactive and multifaceted e-learning environment is developed.</li> <li>Curriculum components that shift away from a 'classical classroom' constellation and introduce students to fieldwork, groupwork, collaboration with non-academic actors, etcetera, are developed, often in collaboration with partner institutions and alumni.</li> <li>Virtual collaborations expand perspectives in classroom discussions and sensitise students to other forms of knowledge production and modes of conducting scientific research.</li> </ul>
Networks and partnerships	Strengthened interactions within reciprocal partnerships and engagements at local, regional and global levels between HE&SIs, researchers, staff, students and other stakeholders in society (public actors, private actors, other CSOs, communities,	<ul> <li>New research partnerships with private and public actors or civil society are developed to have more societal impact and attract new funding to ensure sustainability.</li> <li>Alumni network events are organised to keep alumni connected to HE&amp;SIs</li> <li>Exploration of partnership potential/formulation missions (matchmaking sessions, seminars, exchange meetings)</li> </ul>

	etc.) for sustainable development	<ul> <li>Equity, diversity, and inclusion in teaching and learning are promoted to professionals.</li> <li>Blended learning opportunities are initiated, collaboratively planned by partners using their specific expertise when relevant.</li> <li>A network providing access to facilities, resources (including funding) and ideas is in place.</li> <li>Innovative practices are developed, tested, exchanged, and implemented in the framework of a network of institutions, students and alumni.</li> <li>Alliances to tackle skill gaps and foster innovation in and through higher education together with e.g., the private sector are in place.</li> </ul>
Outreach and policy support	Enhanced interaction with relevant public, private, and academic stakeholders to share knowledge, create the conditions for uptake, and provide policy advice/support.	<ul> <li>Demonstration workshops for stakeholders are organised (participation of women is promoted).</li> <li>Improved scientific communication methods and strategies to share results with broader audience</li> <li>Seminars with industry, government agencies, and development partners are organised on a regular basis .</li> </ul>
Research programmes and methods	Improved (interdisciplinary) methodologies and strengthened quality and relevance of research to allow for better knowledge management and high-quality research results serving societal needs.	<ul> <li>Workshops on participatory/ transdisciplinary research methods for researchers</li> <li>Feed-in from research-based learning methods into research practices of partner HE&amp;SIs</li> </ul>
Systems, policies, and infrastructure	Better management, information systems, educational and research policies to improve functioning of HE&SIs, including policies on gender and diversity, research integrity, and uptake. Improved equipment, laboratories, and offices for education and research.	<ul> <li>Establishing adequate policies, rules and regulations at level of partner HE&amp;SI (e.g., revision/development of educational policies accreditation systems/ HR policy, gender policy, environmental policy, etc.)</li> <li>Adequate policies are in place to support/improve access for students from vulnerable groups and ensure gender-balance among students and staff.</li> <li>Measures are taken to reduce environmental impact (CO<sub>2</sub> compensation, less paper-based, limited travel, recycling, etc.)</li> <li>Upgrade of supporting research and education facilities at level of partner HE&amp;SI's</li> </ul>

# 7.3 SDG principles as a compass for VLIR-UOS projects

The SDG principles serve as a compass for VLIR-UOS' endeavour of sharing minds, changing lives. As visualised in the ToC, they are transversally integrated, using a broad interpretation of the principles, to make the activities and change processes SDG-proof. Additionally, VLIR-UOS uses the SDG principles as a compass to integrate the principles of "synergy and complementarity" and the integration of transversal and priority themes of the Belgian Development Cooperation into its operations. Integration of these principles is an important element in the selection of projects.

Interconnectedness: VLIR-UOS recognises that given the complexity, scale, and interconnectedness of current societal challenges, meaningful social, economic, and ecological transformations can only be realised by approaching the SDGs from a holistic and integrated viewpoint. More precisely, VLIR-UOS strives for holistic transformations by encouraging projects to reflect on their position in the interplay of global challenges and national needs, and to bring together the different types of expertise that are necessary to successfully implement the project. As an essential first step in considering the complexity of societal change, all VLIR-UOS supported projects develop a holistic context analysis that moves beyond sectoral and disciplinary borders and should analyse the positive as well as negative interlinkages between the SDG goals. This also includes attention for the transversal themes gender equality and environment sustainability. Regarding gender, VLIR-UOS and its partners engage in fixing the numbers, fixing the knowledge, and fixing the organisation, in line with the theoretical threefixes model of Londa Schiebinger (See VLIR-UOS gender policy document). Projects are expected to align with this threefold gender strategy in their proposal. Regarding environment, project applicants are invited to consider the environment and environmental sustainability during the project identification & formulation phase, as well as to monitor and reflect upon the project's effects on the environment and the risks posed by the environment on their project. Thereby, projects should be guided by the 'do no harm' principle to prevent, reduce, and control the risk of environmental harm. Besides integration of gender equality and environmental sustainability concerns within project management, the transversal themes can also feature in the projects' content.

Coherence, interinstitutional collaboration, and Multi-stakeholder partnerships (MSP): The complexity, scale, and interconnectedness of the current societal challenges that the SDG framework is seeking to address, requires a concerted effort or collaboration by a wide variety of actors. This need for concertation/collaboration is translated to 3 potential approaches. Proposals are invited to explore them.

• Coherence: The Agenda 2030 urges actions to be coherent with the actions and networks of other actors and/or other HES4SD initiatives. An analysis of complementary actions by academic and non-academic actors is essential for each partnership (to ensure coherence). VLIR-UOS wants to facilitate coherence and connections between different actors and projects present in each country and across borders. With these objectives in mind, Country Reference Framework (CRF) documents<sup>6</sup> support teams of academics when identifying and formulating project proposals, by providing a context analysis per country, focused on Agenda 2030 on Sustainable Development and the higher education sector, and by providing an overview of

<sup>&</sup>lt;sup>6</sup> Country reference frameworks were elaborated for the 17 countries + Belgium in the VLIR-UOS project partner country list. (see links at the end of this document)

- Belgian development actors active in the country and of their ongoing projects and partners, in view of exploration of opportunities to connect and assure coherence.
- Interinstitutional collaboration: This concerns a structural collaboration between several higher education institutions at Flemish and/or partner level within the framework of a project, pooling available expertise, with the aim of obtaining better results.
- Multistakeholder partnership (MSP): this concerns a structural collaboration with at least 1 non-academic actor (= multi-stakeholder; civil society, private sector, governmental actors, etc.) in which this actor plays an active role in the project implementation. VLIR-UOS takes into account the MSP principle by promoting collaboration between different actors (beyond HEIs) to co-create, share, and mobilise knowledge and expertise across disciplines, sectors, interest groups, and borders. More precisely, VLIR-UOS explicitly puts forward the science-society interface and knowledge uptake, and the importance of strengthening it.

Leave no one behind: VLIR-UOS recognises the need for proactive strategies to ensure that vulnerable and marginalised populations are included and benefit from higher education partnerships for sustainable development. The LNOB principle is taken into account by looking at partners with whom we work, at beneficiaries for whom we work, and on what we focus in projects. VLIR-UOS encourages projects to take gender and vulnerable groups into account, by putting forward partnerships with mid-range or small-scale institutions, by awarding scholarships to a diversified group of beneficiaries, and by promoting transformative or community-based types of research. More precisely, international top higher education institutions are only considered when they participate as supporting partners in projects, scholarship attribution is not only based on academic excellence in terms of scientific output, and mainstreaming approaches are put in place to consider inclusion and (gender) equality in each project. ITP projects, in particular, aim to be accessible for academics/researchers in the early stages of their academic career, interested to explore the potential for higher education for sustainable development. As mentioned earlier, regarding gender, VLIR-UOS and its partners engage in fixing the numbers, fixing the knowledge, and fixing the organisation for gender equality. This is also an important dimension of the Leave No One Behind principle.

# 8. Project formats, call annexes, and background information

# 8.1. Project formats

Formats available on our website and which have to be submitted:

Format for a project proposal (offline working document)	This format is to be followed when drafting the
	project proposal and includes the guiding ques-
	tions for the narrative sections per module. All
	information in this working document will need
	to be included directly in the online tool for pro-
	ject submission.
Annex 1: Format Project proposal	This Excel format is used for the input of gen-
	eral project info, details on team members, and
	the activities per intermediate change domain.
	It is to be uploaded in the project submission
	tool.
Annex 2: Format Budget proposal	A project proposal is only complete if a duly
	completed and detailed budget is added. This
	document gives you the format of a budget ta-
	ble and is to be uploaded in the project submis-
	sion tool.

Mandatory annex, as a free format / no template available:

Annex 3: CVs of the promoters	Please add the CVs of the promoters in the
	module organisation (via an online link if possi-
	ble or upload a pdf version of the short CV. Op-
	tional: CVs of the co-promoters.
Annex 4: Endorsement Letter (free format - optional)	Endorsement letter of a partner institution: insti-
	tutional support letter, referring to the employ-
	ment link of the main partner promoter with a
	(recognised higher education) partner institu-
	tion, and the support of this same institution to
	the project. The letter should be signed at least
	by an authority at Faculty level.

#### 8.2. Call annexes

The following <u>annexes</u> are essential background information when formulating a proposal, and can be downloaded from the VLIR-UOS call page:

Call Annex 1	A guiding PowerPoint is provided with an in-
Introduction to the formats and formulation guidelines	troduction to the formats and main formula-
ITP 2023	tion guidelines.
Call Annex 2:	This presentation provides an overview of
Financial guidelines for project proposal writing for	the VLIR-UOS financial framework. These
ITP projects	provide an overview of the budget lines that
	are applicable and indicate what expenses
	are allowed within the framework of ITP pro-
	jects. The overview also refers to the new
	scholarship framework and the current Hotel
	and per diem allowances (version 6 July
	2018) available on the VLIR-UOS website.

# 8.3. Background information

<u>Links to country reference framework documents per project partner country:</u> These documents provide (i) an overview of ongoing VLIR-UOS projects (ii) summary info on a partner country's approach towards Agenda 2030 and the SDGs; and (iii) general info on the higher education sector and on proposed activities of Belgian cooperation actors, with a focus on the non-governmental cooperation.
