Information on the country strategy Rwanda

For each partner country of VLIR-UOS, a country strategy has been developed. The country strategy represents the strategic niche for VLIR-UOS cooperation in a country, with specific thematic areas and an institutional and/or regional focus, based on the needs and national priorities of the country with regard to higher education and development. The VLIR-UOS Country Strategy for Rwanda fits in with the national development strategy Vision 2020 which indicates that the development of a knowledge based economy is a top priority and which foresees a key role in this for higher education and research. This is translated in the country strategy in following central themes: ‘food security’, ‘natural resource management’, ‘environment’, ‘health’ and ‘human rights & governance’. Different themes related to ‘research strengthening’, ‘educational strengthening’, ‘ICT’, ‘innovation’... have been identified as crosscutting themes. A geographical focus was not put forward, although it is suggested to assure the link with rural areas in research. As for the institutional focus, A specific type of institution was not put forward, as to explore cooperation possibilities.

Information for potential synergy and complementarity

Synergy and complementarity (S&C) can improve the impact of development cooperation interventions and is a top priority of the Belgian minister of Development Cooperation and encouraged by the reform of non-governmental cooperation in 2016. In order to promote S&C, all Belgian non-governmental development actors were invited to elaborate a Joint Strategic Framework (JSFs) per country in 2016. These JSFs provide information about the goals to which the actors want to contribute, and also indicate potential for synergy and complementarity. In the table below, a general overview of relevant information from the Joint Strategic Framework Rwanda is provided for each thematic area of the VLIR-UOS country strategy. The Joint Strategic Goal relevant for each theme is listed, together with the Belgian non-governmental actors which are active in this area with funding of the Belgian development cooperation. Synergy and complementarity will also be integrated as an element in the selection of interventions, more in particular when discussing the (developmental) relevance of project proposals. The last updated version of the JSF Rwanda can be found [here](#).

| 11.11.11  | In Rwanda, 11.11.11 works with organizations that defend democratic equity from a legal perspective. They work for good participatory governance and react against reducing the space available in their country for civil society. The 11.11.11 programme will contribute to increasing pressure on governments at all levels to ensure democratic management that respects human rights. The main themes defended by the partners are citizen participation and governance. | • Conseil de Concertation des Organisations d’Appui aux Initiatives de Base

Broederlijk Delen (BD)  Broederlijk Delen works together with a coalition of 6 Rwandan Civil Society Organisation in a joint program that supports some 5,000 Rwandan rural households in their quest for better living conditions. Those partner organisation support the poorest families by focusing on agro-ecological family farming, income-generating activities, improving social cohesion (mediation, non-violent conflict resolution) and promoting active citizenship. Our national partner organizations support the farmers' movements to develop a better service to and advocacy of family farmers.

Caritas International (CI)  The goal of the Caritas International Program and its partners in Rwanda is to transform 4,000 Rwandan “vulnerable peasant households” in a self-sufficient household ensuring the food security of its members through the increase and diversification of its production as well as its sources of agricultural and non-agricultural income. A resilient household thanks his leading role in the preservation of the environment from which he derives the majority of his income through intensive agro-ecological practices of conservation and improvement of soil fertility.

Croix Rouge Belgique (CRB)  The CRB community resilience program fits in the National Strategy Model Villages of the Rwandan Red Cross. Model Villages are a holistic approach to building capacity and tackling vulnerabilities. The Rwandan Red Cross brings a global response through simultaneous and coordinated intervention in different sectors: water, hygiene and sanitation, health, nutrition, disaster preparedness and

also develop a national curriculum of courses and methodologies adapted for children / young people who are blind or visually impaired

Réseau de Citoyens – Citizen Network Justice & Démocratie (RCN J&D)

The Justice and Remembrance Program aims to make it easier for Rwandan people to understand and participate in genocide trials on the basis of universal jurisdiction, and to promote the integration of contributions of these trials in the memory of genocide justice in the country. After the 1994 genocide, justice has been accepted as one of the essential tools both for the fight against the culture of impunity, but also as an instrument for preventing mass crimes and restoring social cohesion.

The cooperation will focus on first aid training and water, sanitation and hygiene (WASH). First aid is a priority for Red Cross societies worldwide and especially relevant in Rwanda, because of frequent disasters and lack of health structures and services. Access to sufficient and safe water and sanitation is an important contributor to overall health and poverty reduction. Apart from access, the programme also focuses on behavioural change.

VVOB enhances school leadership quality and training and high quality induction for newly qualified teachers through mentorship and supervision. Through capacity development VVOB aims to improve these systems and thus address the competences of Primary School Leaders, Mentor Teachers and Newly Qualified Teachers, ultimately leading to improved learning outcomes of primary school pupils. Through effective implementation of the new competence-based curriculum, the focus of the programme is on improving learning outcomes in mathematics, particularly those of disadvantaged girls in Eastern Province and Western Province.
