# Country reference framework Bolivia

## Background

In FYP1 the VLIR-UOS country strategies presented the strategic niche for future VLIR-UOS cooperation in a specific country, leading to strategy-based calls for proposals.

In FYP2, however, we shift towards an approach whereby a country reference framework provides information rather than strategic guidance. The country reference frameworks will be used mainly to support teams of academics when identifying and formulating project proposals, by providing a context analysis focused on Agenda 2030 on Sustainable Development and the higher education sector in a given country, and by providing an overview of Belgian development actors, their ongoing projects and partners in that country in view of exploration of opportunities for synergy and complementarity.

The country reference frameworks consist of three components:

- (i) overview of VLIR-UOS projects in the country;
- (ii) context analysis focused on the Agenda 2030 framework and the higher education sector;
- (iii) overview of Belgian development actors (ANGCs involved in thematic or geographic JSFs & Enabel), their local partners and their regional/thematic focus.

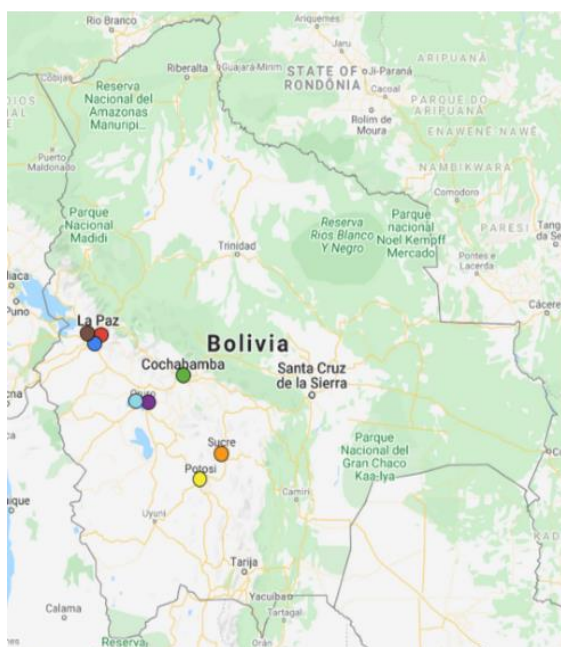

The frameworks have been elaborated based on information available at the time of drafting this actor programme (1st half of 2021) and through consultations with both Flemish and local project promoters in 2020-2021, and with geographic JSFs, when applicable, to ensure relevant information for coherent project formulation is included.

Prior to the launch of competitive calls, the ANGCs active in the country/region will be invited to list a number of research themes/questions that can be addressed by HE&SIs in the framework of VLIR-UOS funded projects or scholarships. Synergy and complementarity will be integrated as an element in the selection of project proposals, more in particular when discussing the (developmental) relevance and coherence of the proposals and the extent to which the multi-stakeholder partnership principle has been reflected in the project's implementation set-up. By this mode of operation, the thematic JSF on Higher Education and Science for Sustainable Development links up with the other geographic JSFs.

Evidently, the frameworks will be updated regularly in consultation with the HEI&SI stakeholders and with the respective geographical JSFs and, where appropriate, also with ARES, and especially prior to the launch of competitive calls by VLIR-UOS, to be compatible and responsive to evolving/emerging needs and priorities of academic and development actors active in the country/region/sector.

**Bolivia is an important partner country of VLIR-UOS.** From 2003 to 2023 VLIR-UOS spent more than € 11,2 million in cooperation with Bolivia, including a long-term Institutional University Cooperation (IUC) Programme with **Universidad Mayor de San Simón (UMSS)** of Cochabamba and an ongoing IUC programme with the **Universidad Católica Boliviana (UCB)** which started in 2017 and is now in its 2<sup>nd</sup> phase of cooperation. This IUC, together with a number of TEAM/SI projects form the core of the cooperation with Bolivia.

More detailed information can be found on our [Bolivia country page](#) on the VLIR-UOS website

## 1.2 Ongoing projects and future calls (2022-...)

TEAM	2022-2027	KAWSAYTA AWANACHEJ* – A Bolivian community learning-research network in sustainable territorial governance and management	Tom Vanwing (VUB) / Chang Zhu (VUB) & co-promoter Adriana Cely	Cesar Escobar Vasquez	Universidad Mayor de San Simón	299.990,90

Abbreviations (type): IUC=Institutional University Cooperation; SI=Short Initiatives; TEAM= TEAM project. / Abbreviations (Flemish institutions): UG=Ghent University; UA=University of Antwerp; VUB=Vrije Universiteit Brussel.

Table 1 Ongoing VLIR-UOS projects that will continue in FYP II

Competitive calls for new SI and TEAM projects starting as of 2022 will be launched and announced on our website. Nationals of Bolivia are eligible<sup>1</sup> to apply for scholarships for the International Master Programmes (ICP) and International Training Programmes (ITP).

<sup>1</sup> Admission requirements, application procedures and selection procedures differ across the programmes and host institutions.

## 2 Bolivia and the 2030 Agenda for Sustainable Development

### 2.1 Bolivia and the Sustainable Development Goals

Bolivia undertook its first [Voluntary National Review](#) (VNR) in 2021, originally planned in 2020 but postponed due to the crisis, to assess the country's progress towards achieving the SDGs. Since 2006, Bolivia implemented a socio-economic community-based model, envisioning "Vivir Bien" or "Living well", and managed to reduce extreme poverty from 37,7% to 12,9% in 2019. In this period, improvements were also noted in child undernutrition and food production, access to healthcare, education quality, political participation of women in government decision-making, access to potable water and sanitation, renewable energy production and job creation, due to various policies and programmes. To guarantee access to healthcare for all, a universal and free system for healthcare (called SUS) was established, which together with other policy measures, considerably reduced infant mortality. Regarding gender equality, the government created an interinstitutional commission to implement the comprehensive public policy for a dignified life for women. Looking at the progress made in higher education, enrolment rates of the population between 19 and 23 years old increased from 35,4% in 2015 to 43,5% in 2020. Despite large investments in road networks over land, sea and air, there still needs to be 4636km constructed to achieve the goal of 10756 km, hereby aiming at 100% integration of the population in road networks. At the same time, steps have been taken to improve the quality of fuel and to monitor air quality and car imports within the limits of polluting emissions. Housing has also improved through the Government Agency of Housing, reducing the lack of housing from 49% in 2015 to 45,2% in 2019. Regarding management of natural resources, the country has implemented plans to better manage forests with the involved stakeholders and reduced illegal deforestation by 10% between 2015 and 2020.

This positive trend towards achieving the SDGs abruptly took a downward road when a local political crisis exploded in November 2019. Poverty and inequality rates increased again as the economy shrank by 11%, worsened by the COVID pandemic that hit the country hard. However, in November 2020, the government reaffirmed its commitment to contribute to Agenda 2030 and the SDGs in line with the national objectives to redistribute income and reduce inequality; to create new economic opportunities and decent work; to reduce corruption, bureaucracy and improve justice and security; all with respect for Mother Earth. Bolivia has initiated a trajectory to bring back peace and unity in the country, to fuel economic growth through industrialisation and diversification and to reduce poverty and inequality. Many challenges lie ahead that will have to be overcome through the formulation of a new national economic plan for development for the period 2021-2025, following up on the plan of [2016-2020](#). The plan is guided by the Patriotic Agenda of 2025 and consists of 13 pillars, with in total 68 goals, which are related to the SDGs:

- 1) Eradicate extreme poverty (SDG 1, 4, 5, 10, 16)
- 2) Universalization of basic services (SDG 1, 6, 7, 9, 11)
- 3) Health, education and sports (SDG 3, 4)
- 4) Scientific and technological sovereignty (SDG 2, 8)
- 5) Community and financial sovereignty (SDG 1, 2, 8, 17)
- 6) Productive sovereignty with diversification (SDG 2, 8, 9, 15, 17)
- 7) Sovereignty over our natural resources (SDG 7)
- 8) Food sovereignty (SDG 2)

- 9) Environmental sovereignty with integrated development (SDG 6, 10, 12, 13, 15)
- 10) Complementary integration of peoples with sovereignty (SDG 17)
- 11) Sovereignty and transparency in public administration (SDG 16)
- 12) Full enjoyment and happiness (SDG 15)
- 13) Sovereign encounter with our joy, happiness, prosperity and our sea

The implementation of the development plan and SDGs is monitored by the Interinstitutional Committee of the PDES and Sustainable Development Goals (CIMPDS), established by the multimministerial Resolution N°1 of October 30, 2017.

Taking into account the global aspect of the SDGs, the [Sustainable Development Report](#) of 2021<sup>2</sup> assesses where each country stands with regard to achieving the SDGs. Bolivia ranks 90<sup>th</sup> out of 165 countries included in the report. The [Bolivia Country Profile](#) shows that the majority of goals is facing major or significant challenges.

As an umbrella organisation that works with calls for proposals, VLIR-UOS supports interventions for and through higher education institutes, supporting them in the areas of education, research and uptake and thereby strengthening them in their role as development actor. Doing so, the impact of the interventions supported by VLIR-UOS can be found in a large variety of sectors. In line with its major intervention area, VLIR-UOS positions itself within the education sector, especially focused on higher education, research and innovation (SDG 4 and 9). However, through its interventions, VLIR-UOS intervenes in different sectors as well. VLIR-UOS recognises that given the complexity, scale and interconnectedness of current societal challenges, meaningful social, economic and ecological transformations can only be realised by starting from a holistic and integrated approach to the SDGs. When translated into SDGs, the projects that were financed by VLIR-UOS in Bolivia covered mainly, apart from SDG 4 and 9, SDGs 1, 2, 3, 6, 10, 14 and 15. Top sectors for VLIR-UOS in this country for the past decade are environment and natural resources, food security and sovereignty and social development.

More background information and context analysis on Bolivia can be found in the **geographic Joint Strategic Framework** for Bolivia, which will be shared with (potential) project promoters when new calls are launched.

## 2.2 Higher education landscape in Bolivia

Education in Bolivia is the responsibility of the Ministry of Education and regulated by [Law 070, of 20 December 2010](#). Education is defined as a fundamental right for all, highlighting its inclusive character and free until university. Bolivia devotes 23% of its annual budget to educational expenditures, a higher percentage than in most other South American countries. Nevertheless, a divide between the rural and urban areas persists: urban illiteracy decreases, whereas rural illiteracy levels remain high. A [sectoral plan](#) for the development of the educational sector for the period 2016-2020 focusses, amongst others, on:

- Quality education that meets basic learning needs of children and adolescents;
- Education and vocational training that responds to the development of productive and competitive capacities of youth and adults;
- Participative and efficient management which leads to quality and equity in education and training.

The Bolivia higher education landscape consists of universities (in total about 50), technical institutes (Industry, Natural resources, Trade and Services) and 27 teacher training schools. Roughly, Bolivian Universities can be divided into four groups: the Public Autonomous Universities, the universities under special regime (the first 2 categories forming the “National System”), the indigenous universities (UNIBOL) and the Private Universities (including some foundations). Different from the Belgian system, a Master’s degree is awarded after at least two years of study following upon the *Licenciatura* degree (which lasts for 4 to 5 years compared to only a 3-year bachelor degree in Belgium).

Bolivia counts 11 **public autonomous universities**. These public universities are fully funded by the state based on a percentage of the national budget established by the Constitution. Public universities are totally autonomous in all their economic, academic and educational decisions. The line ministry for higher education is the Ministry of Education, more specifically the ‘Directorate General of University Higher Education’ of the ‘Vice Ministry of Higher Education and Professional Training’. Apart from this 11 public autonomous universities, there are 4 more **higher education institutes with a ‘special regime’** (military and police universities). The 15 higher education institutes form together the ‘Sistema de la Universidad Boliviana’ (Bolivian University System), which has elaborated [a national plan](#) for university development. The following strategic priority areas are included:

- 1) Management of undergraduate and postgraduate professional training
- 2) Management of research, science, technology and innovation
- 3) Management of social interaction and university extension

#### 4) Institutional management

The 'Comité Ejecutivo de la Universidad Boliviana' (CEUB) (Executive Committee of the Bolivian University) was established in 1978 in order to represent and coordinate the Bolivian University System.

In 2008, 3 **Indigenous Universities** were created by Presidential Decree, one for each of the main indigenous language and culture groups of Bolivia. The indigenous universities are grouped as the 'Bolivian University' (Universidad Indígena Boliviana / UniBOL). The indigenous universities were created with the double aim to improve access to Higher Education for people belonging to indigenous groups, and to adapt the pedagogic structure and curricula to the indigenous reality, by means of (social and anthropological) research. The UniBol universities have an academic dependence of the Education Ministry. They offer technical (engineering) studies (agronomy, veterinary, agro-industry) and have each a research centre for indigenous language and culture. The purpose of these research centres is to adapt and enrich the curricula of the technical disciplines with its research on indigenous language and culture to generate a curriculum which responds better to the demands of the specific indigenous groups.

About 40 **private Universities** are active in Bolivia. In comparison to other countries in the region, they have a very recent history (since 1985) and are attended by only 20% of the University students' population. Private Universities were created by religious or commercial organizations. These universities are organized through the ANUP (National Association of Private Universities), but supervised by the Ministry of Education for programme and institutional accreditation. The Private Universities have authorities, appointed by their respective boards, mainly controlled by their respective corporations or shareholders. This is less democratic compared to the public institutions, but offers a more flexible and stable management structure.

According to the [Webometrics Ranking of World Universities](#), no Bolivian university falls within the 2000 ranking worldwide.

## 2.3 Leaving no one behind

With the adoption of the 2030 Agenda for Sustainable Development, the international community pledged to leave no one behind and to endeavour to reach the furthest behind first. The principle of leaving no one behind can be defined as a three-part imperative: to end absolute poverty in all its forms, to stop group-based discrimination that results in unequal outcomes for disadvantaged populations, and to take action to help the furthest behind.

Attention for vulnerable groups is prioritised in the national development plan of 2016-2020, targeting the ones that are furthest left behind in terms for poverty, housing, access to water, education, etc. Bolivia has expanded support to vulnerable and historically excluded populations to achieve universal access to basic services and education. Regarding education, actions focus on recovering, developing and enhancing the knowledge of the language, culture, knowledge and skills of each nation and indigenous native peasant's people, by consolidating intra-intercultural and multilingual education. The government will also promote participation and social community responsibility in education management, developing the social and community values of all Bolivians in a decolonizing and depatriarchalized way. These actions will be coordinated with universities and social and community organisations.

Regarding [gender](#) and diversity policies, a comprehensive law to guarantee women a life free of violence (N° 348) was enacted in 2013, this was followed by a law on gender identity in 2016 (N° 807); and a law against racism and all forms of discrimination in 2019 (N° 045). In addition, the Plurinational Service of Women and Depatriarchalization was created by a supreme decree together with a National Plan for

Equal Opportunities (Decree 29850). However, budget allocation and human resources for its implementation are insufficient. Gender based violence, integrated under SDG 5, is an important challenge to tackle since [the observatory of Gender Equality of Latin America and the Caribbean \(OIG\) of ECLAC](#) indicates that Bolivia is the country with the highest rate of South American femicides (2 out of 100.000 women). In 2017, the Bolivian government also passed a [new law](#) (No. 977 of 26.09.2017) which gives people with disability preferential access to both public and private sector jobs. According to this law, at least 4% of jobs in the public administration and 2% in private enterprises should be occupied by people with disabilities. According to [census data of 2012](#), 3.4%% of the population reported having a disability. However, it seems that households with a disability are not worse of than other households in terms of accessing basic services due to supportive policies.

The UNESCO data on [Deprivation and Marginalization in Education \(DME\)](#)<sup>3</sup> presents the following scheme, showing that challenges remain between the two sexes, between rural and urban, as well as between regions.

**Additional sources on Leaving No One Behind**

- Gender parity index: [school enrolment](#)
- [Global Gender Gap Report 2020](#), including country profiles
- ODI leaving no one behind index: summary [report](#) index 2019; annex [index 2019](#)

- Danish institute for human rights: [Human rights data explorer](#)

3

- Education poverty: the proportion of the population with less than 4 years of education
- Extreme education poverty: the proportion with less than 2 years
- Poorest 20% in the bottom 20% of the Ed. Dist.: what proportion of the poorest 20% are also in the bottom 20% of the education distribution
- Never been to school: what proportion of 7-16 year olds have never been to school

## 2.4 Multistakeholderpartnership - Stakeholder analysis

The complexity, scale, and interconnectedness of the current societal challenges that the SDG framework is seeking to address, requires a concerted effort of a wide variety of different stakeholders. As such, the principle of multistakeholderpartnership – which promotes cooperation and partnerships at different stages and spanning the boundaries of civil society, private sector, government, and academia – is ubiquitous across the 2030 Agenda. An analysis of these stakeholders is essential for each partnership.

Taking a look at the [development partners of Bolivia](#), the Inter-American Development bank represents the main donor of gross official development aid (ODA) in Bolivia, followed by France.

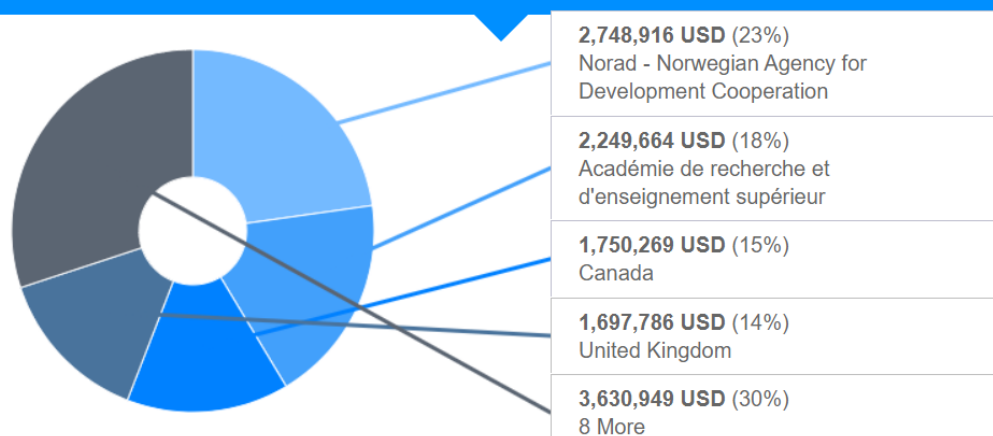

The sectors receiving the biggest funding are health and population with 38%

Source: <http://www.oecd.org/dac/financing-sustainable-development/development-finance-data/aid-at-a-glance.htm>

Based on [data from the International Aid Transparency Initiative \(IATI\)](#), NORAD , ARES (Académie de recherche et d’enseignement supérieur) and Canada are the main donors in the higher education sector in Bolivia.

## Where does the money come from? (IATI all years)

Source: [http://d-portal.org/ctrack.html?country\\_code=BO&sector\\_code=11420#view=main](http://d-portal.org/ctrack.html?country_code=BO&sector_code=11420#view=main)

VLIR-UOS contributes to the 2030 agenda by realizing a societal impact, implying an impact on local communities, civil society, governments, private sector or other higher education institutions. In what follows we list the role and the desired change among the main actors involved in the change process that VLIR-UOS envisages to support through *its interventions*.

Actor	Role and interest/influence
<b>Higher Education Institutions in Bolivia</b>	HEIs in Bolivia are important boundary partners in the realization of VLIR-UOS outcomes in terms of its contribution to Agenda 2030, and the potential contribution to local sustainable development. As project owners they are expected to contribute to HEIs' enhanced institutional performance in the core tasks relating to education, research and societal service delivery strengthening the HEI's visibility and recognition as a centre of excellence. In the long-term, partner HEIs are also expected to have a multiplier effect on the higher education system and development sector in the country or region through their engagement in (global) knowledge-driven partnerships with academic and non-academic stakeholders.
<b>DGD (incl. Belgian embassies in partner countries)</b>	DGD has an advisory role in the VLIR-UOS selection commissions and follows-up on the VLIR-UOS portfolio and the thematic JSF on Higher Education and Science for Sustainable Development. The Belgian Embassies (e.g. in Lima, Peru, since there is no embassy in Bolivia) can play a role in facilitating the uptake of knowledge, the identification, mobilisation and relation building with other stakeholders (e.g. links with European Union, national government, other donors), the contextual updates etc.

<b>Students, professionals, and alumni</b>	<b>Students</b> can be direct (e.g. as a recipient of a PhD scholarship within a project) or indirect beneficiaries (e.g. enjoying improved/innovative didactical approaches) of the projects. As direct beneficiary, their changed role will be about the generation and use of newly acquired knowledge, competences (e.g. global citizenship) and networks in view of sustainable development. Alumni from VLIR-UOS-projects in Bolivia will be important stakeholders in connecting VLIR-UOS projects with each other, with other actors, etc.
<b>Academics/researchers</b>	As direct beneficiaries of the projects, academics and researchers affiliated within Flemish and partner HE&SIs play an important role in co-creating, disseminating and creating conditions for uptake of knowledge relevant to the achievement of the SDGs in line with the needs, policies and priorities of the partner HE&SIs, local/national or regional stakeholders.
<b>Members of the thematic JSF on Higher Education and Science for Sustainable Development</b>	VLIR-UOS, ITM and ARES have initiated the JSF on HESD4SD to further unlock the developmental potential of higher education and science cooperation for sustainable development and make it accessible to other local, Belgian and international partners as scientific advisor to other partners' projects, partners or policy bodies, as a platform for sharing state of the art scientific results, information, expertise and experience and for exploration of possibilities for synergy and complementarity. ARES and VLIR-UOS are present in Bolivia.
<b>Belgian Actors of the Non-governmental Cooperation</b>	VLIR-UOS continuously tries to identify and encourage synergy and complementarity between Belgian ANGCs and academic stakeholders. Through the uptake of research results, mobilisation of local stakeholders, participation in trainings or courses, identification and communication of relevant research questions/opportunities, hosting of international internships, facilitating student mobility... these actors play a critical role.
<b>Belgian bilateral cooperation (BIO &amp; Enabel)</b>	VLIR-UOS will regularly exchange with Enabel and BIO to identify and communicate opportunities for synergy and complementarity with academic projects of the partner HEIs (e.g. through country reference frameworks, JSF platform). In the case of Bolivia however bilateral cooperation and Enabel activities are already out-phased but quite some important bilateral contacts remain and potential links with BIO can be further investigated.
<b>International organizations and other donors (e.g. WHO, UNESCO, World Bank, European Commission...)</b>	Interventions undertaken by international organisations like UN agencies such as FAO or international donors active in higher education cooperation can be complementary in the achievement of the objectives of projects. They can, for instance, play a role in the use and upscaling of new knowledge or practices or serve as seed money for bigger interventions financed by these international organisations.

<b>Academic/science (inter)national and regional networks</b>	<p>Regional or (inter)national academic/science networks (e.g. CAMES, IUCEA) are among the potential indirect beneficiary as targeted HE&amp;SIs strengthened in their research/educational capacities can improve the functioning of the networks they are part of through the co-creation, exchange and uptake of knowledge among academic stakeholders. Similar effects can be realized in the case of alumni and scholarship networks/associations when former scholarship students act as agents of change within these networks.</p>
<b>Public sector: Local or central government and political community</b>	<p>Engage in evidence-based governance that puts knowledge to the test by being a stakeholder in the co-creation of inclusive (innovative) solutions and effective user of research results to foster good governance for sustainable and coherent policies.</p> <p>Pillar 4 of the national development plan seeks to strengthen the capacity to develop knowledge and technology in strategic, productive and service areas, complementing the traditional knowledge with modern science through an inter-scientific dialogue. The aim is to lay a solid foundation for putting science and technology at the service of production and economic development with sovereignty, articulating the knowledge of modern science with ancestral and ancient knowledge. To achieve this, the participation and coordination of the public, private sector and public and private universities in the country is crucial.</p>
<b>Private sector</b>	<p>Individuals and companies who operate for profit and which are not controlled by the state can play a role within projects as users of the knowledge, applications and services (co-)created as result of the project and therefore contribute in particular but not only to SDG 9 on industry, innovation and infrastructure. Bolivia aims to strengthen the technological and inter-cultural scientific development, including the active involvement and participation of indigenous people, Afro-Bolivians and intercultural peoples as carriers of traditional and local knowledge.</p>
<b>Civil society, social movements and local communities</b>	<p>Civil society actors, social movements and local communities are expected to co-create, access and use the knowledge and research products generated within the framework of projects thereby making a potential contribution to the entire range of SDGs. The national development plan is implemented in a participatory way including all social actors, social organizations of indigenous-native-peasants, intercultural and afro-Bolivian communities, and also producers, traders, and workers' organizations, neighbourhood councils, students, teachers and factory workers.</p>

## 3 Synergy and Complementarity with other (Belgian) development actors in Bolivia

### 3.1 VLIR-UOS approaches to synergy and complementarity

Drawing upon their longstanding common history, VLIR-UOS, ARES and the Institute of Tropical Medicine (ITM) jointly developed the thematic Joint Strategic Framework on Higher Education and Science for Sustainable Development (JSF HES4SD). Through cooperation with civil society, private and public sector, the JSF initiators<sup>4</sup> aim to further unlock the huge developmental potential of higher education and science cooperation for sustainable development and make it accessible to other Belgian, local and international partners, in different ways: as partner in a multi-actor partnership, as scientific advisor to other partners' projects, partners or policy bodies, as a knowledge broker for sharing state of the art scientific results, information, expertise and experience and for exploration of possibilities for synergy and complementarity. This reference framework for Bolivia will feed into the **platform** that the initiators of the JSF HES4SD plan to create to proactively communicate opportunities and facilitate such cooperation. More precisely, the platform can be used to:

- (i) communicate about the launch and results of competitive calls for projects;
- (ii) communicate other opportunities for projects or scholarships;
- (iii) gather/exchange on collaboration opportunities (e.g. requests for scientific advice);
- (iv) share information about ongoing projects, events and seminars in the country/region.

### 3.2 Bilateral development cooperation (Enabel) in Bolivia

Since 2020, Bolivia is no longer a partner country of the Belgian Development Agency Enabel.

---

<sup>4</sup> The three JSF initiators represent 60 Belgian higher education institutions (HEIs), being 11 universities, 32 university colleges, 16 school of arts, and ITM.

### 3.3 Belgian actors of the non-governmental cooperation in Bolivia

#### 3.3.1 Thematic Joint Strategic Framework on Higher Education and Science

Institutional Partnership:

Belgian HE&SI		Partner HE&SI	Topic/ thematic focus	Contact person
<b>ARES</b>	Université de Liège (ULiège)	Universidad Mayor de San Simon (UMSS)	BUSCAR: The Bolivian humid tropical zone for the implementation of a sustainable cassava value chain, within the framework of family farming, as a socio-ecological resilience strategy (PRD 2020-2025)	Oumou Zé

And for more info the ARES website can be checked: [Bolivie | Moove \(ares-ac.be\)](http://ares-ac.be)

ITM does not have any already identified partners in Bolivia.

#### 3.3.2 Bolivia Joint Strategic Framework

In the table below, ANGCs in bold are heavily involved in the Strategic Goal, ANGCs in regular layout are moderately involved and those in brackets are slightly involved.

	Description of the strategic goal	ANGCs	Local partners
